

Job Title: Windchill Developer / PLM Developer

Location: Texas (Dallas, Houston, Austin preferred)

Experience: 3-8 years

About the Role:

We are seeking an experienced Windchill Developer to support PLM implementation and customization projects for our manufacturing clients.

Required Skills:

- PTC Windchill (PDMLink)
- Java development
- Windchill customization (OIR, workflows, lifecycle templates)
- Experience with Windchill upgrade and migration projects

Preferred Skills:

- Teamcenter or other PLM platforms
- REST API integration
- Oracle or SQL Server databases

Requirements:

- Bachelor's degree in Engineering or Computer Science
- Strong communication skills
- Must be authorized to work in the United States
- No interns or freshers · experienced hires only

Industry: Manufacturing / Aerospace
