

Windchill Developer

Experience: 5+ Years

Location: Texas, US (Hybrid / Remote / Onsite)

Job Summary

We are looking for a skilled Windchill Developer with 5+ years of experience in PTC Windchill PLM development, customization, and integration. The ideal candidate should have strong expertise in Java development, Windchill customization, workflows, and enterprise system integrations.

Key Responsibilities

- Develop and customize PTC Windchill PLM solutions.
- Configure workflows, lifecycles, business rules, and object initialization rules (OIR).
- Develop custom solutions using Java/J2EE and Windchill APIs.
- Build and maintain integrations with ERP systems, CAD applications, and REST/SOAP services.
- Troubleshoot, optimize, and support Windchill applications.
- Prepare technical documentation and collaborate with cross-functional teams.

Required Skills

- 5+ years of experience in PTC Windchill development.
- Strong expertise in PTC Windchill PDMLink.
- Proficiency in Java, J2EE, JSP, Servlets, and SQL.
- Experience with Windchill APIs, Workflows, Lifecycle Management, OIR, and LWC.
- Hands-on experience with Info*Engine and REST/SOAP Web Services.
- Experience integrating Windchill with ERP systems such as SAP or Oracle and PTC Creo.
- Familiarity with Oracle Database, Git, Maven, Jenkins, and Agile methodologies.

Nice to Have

- Experience with ThingWorx.
- Experience with Windchill upgrades or migrations.
- PTC Windchill Certification is a plus.

Candidate Eligibility

Location restriction: Texas, US candidates only. Candidates should have 5+ years of relevant Windchill development experience.
